

PRESS RELEASE

Iguana EXPEDITION

« Make the best of every terrain »

Iguana Yachts is opening a new chapter of its success story which spans the globe with the unveiling of the Iguana Expedition 31. True to its values, the Expedition's quality-of-build, sense-of-details and robust capabilities are the "marque de fabrique" of this renowned French company. The Expedition 31 features a rugged style for improved protection, a more generous use of robust materials and a heavy-duty exterior and interior which improves ease-of-maintenance and durability, while at the same time preserving the elegant sensation for which Iguana Yachts are famous.

Created to conquer challenges, the Iguana Expedition continues to elevate Iguana Yachts' performance evolution. From its advanced technologies, to its purposeful elegance this unit is unmistakable and irrefutable. Every surface of the Iguana Expedition reflects its confident capabilities.

“ With the launch in 2012 of the Iguana 29 EXCLUSIVE and the CLASSIC we have reached and given an appropriate solution to the very demanding world of the Mega Yachts and private islands. In 2016 with the EXPEDITION we are creating a new line of product to enter a new market. This all-terrain unit serves the most demanding clients and allows us to extend the world coverage of Iguana Yachts. From South America to Asia, from Australia to Africa, professionals and adventurers now have a fully integrated amphibious solution. ”

Antoine BRUGIDOU
CEO of Iguana Yachts

Time-proven, marine-grade hardware, carbon fiber construction, and advanced proprietary technology team up to combine extreme capability with supreme confidence and ease-of-use. Its automated hydraulic drive and 2-speed transfer power the Expedition with the widest overall gear range of any amphibious boat. The Iguana Expedition can scale a 30° direct incline, up or down, and manage a 25° lateral slope. On slippery terrain, its low ground pressure coupled with the Electronic Traction System can instantly send the engine's torque to the wheels with the best grip. As you delve deeper into the terrain, you can engage "fast-mode" to actively release the track tension and progressively increase the power and speed. It's arguably the most capable amphibious boat drivetrain in production with a degree of engineering depth that can tackle nearly any surface. Waves, swell, mud, gravel, rocks, asphalt and extreme gradients are no problem for the Iguana. With the new Iguana Expedition, Iguana Yachts is charting a new course and showing that its amphibious boats are optimally armed for all challenging surfaces.

“ How can you discover new lands if you never leave home? Trip planning is traditionally about creating a seamless experience, but when a journey is too predictable the excitement and adventure is lost. It is the unexpected challenges, the hard work and tricky negotiations which end up making your travels interesting and exhilarating. ”

Steve HUPPERT
Sales manager at Iguana Yachts
describing the genesis of the Expedition

Devoted to your comfort, the Iguana Expedition may be equipped to endure some of the most unforgiving conditions, but it will never ask the same of you. The smooth wave-piercing hull and multi-contour, shock-mitigating seats provide comfort, safety and freedom to keep exploring even in harsh conditions, and the Sunbrella® fabric is cozy and easy to maintain.

Another distinct feature of the Expedition is a heavy-duty bumper that completely surrounds the hull from the bow to the stern, providing permanent side protection. Docking or tying up to a yacht is made safe and easy, and there is a smart under gutter that directs the water away from the boat making Iguana Expedition extremely dry.

The Expedition leverages the latest in technology to maximize safety and comfort by integrating the GPS/Chart Plotter, radar, AIS VHF radio, and audio entertainment with your own wireless digital sources. The NEEMA-compliant backbone allows you to access all electronics via one display, and empowers you to overlay AIS data, Radar and GPS/Charts providing the ultimate in safe navigation. Plus, there are a variety of ways to personalize the controls and experience. There is even an intuitive controller that lets you set up a one-touch favorite key to easily access the stereo and music source. This coupled with a 4-speaker Bose sound system and subwoofer fill the cockpit with crystal-clear digital audio for a truly immersive experience.
