

JULY 2020 – NEW: THE IGUANA KNIGHT

For a more luxurious amphibious RIB experience.
Custom designed to fit your lifestyle.

In 2018, Iguana Yachts launched successfully its first amphibious RIB, the X100. In 2020, after 11 years of continued amphibious development and to answer an increasing demand from RIB users, Iguana Yachts is proud to be launching the Iguana Knight.

Designed with highest standards at its core, the Iguana Knight combines all the functional capability of a RIB with Iguana's versatile and pioneering mobility system.

"After the huge success of the X100, Iguana experienced an unprecedented demand for a more luxurious RIB built to a higher specification. That's why we launched The Iguana Knight"

Antoine BRUGIDOU - President & Founder

Flexible, strong, and uniquely functional, the Iguana Knight is the ideal platform for water sports or unrestricted exploration. It provides the most incredible amphibious capability without compromising the fundamental seaworthiness expected of a luxurious RIB.

Perfect for waterfront property's owners who want to embark directly from their house.

The Knight is also set up as a chase boat for a small superyacht or as a tender on a larger megayacht.

KEY FEATURES

PREMIUM FEATURES – as standard. Comfort pack, touchscreen electronics, surround sound system, premium upholstery and marine head.

STYLISH – Exquisite attention to detail and a chic design for an elegant and luxurious RIB. Available in multiple elegant colour themes to match your personality, yacht and lifestyle.

COMFORT – Sleek lines and a spacious deck; the ideal combination for a functional, comfortable and social tender. Also equipped with toilets as a standard.

SAFETY – Unrivalled stability on land and sea combined with easy and safe boarding for family and guests. Up to 12 persons.

PERFORMANCE – Rugged, flexible, powerful - the driest, safest ride at sea. Twinned with the operational effectiveness of the Iguana Mobility System (IMS), exploration options really are unlimited. Speed up to 48 kts.

FREEDOM – Simple to store and easy to launch and maintain. The added convenience of instant shoreside launching allows more frequent use than a regular boat.

INSPIRED BY OUR CUSTOMERS, FOR OUR CUSTOMERS

The Iguana Knight answers the demands of our discerning customers for a RIB finished to a more luxurious specification. Building on the strong foundations of the X100, the Knight is a bolder RIB available in five elegant and vibrant colour themes.

Iguana Yachts designers have chosen Midnight Black and Arctic White to provide a neutral canvas on which to place your select colours. Subtle accents of Anthracite grey, Vermilion red, Ibiza blue, Aegean blue and Cream set the tone for the series and adorn the upholstery, Flexiteek and outboard engines.

The first Iguana Knight is leaving the factory in Caen at the end of July 2020

ABOUT IGUANA YACHTS

Since foundation in 2008, Iguana's raison d'être is simple: make boating effortless and safe.

The Iguana was created to build boats that are disruptive and provide bespoke experiences.

Innovative amphibious boats, hand built in Normandy by a highly experienced team of designers, engineers and craftsmen. The unique design of the amphibious tracks allows the Iguanas to smoothly climb a wide variety of terrains from soft sand and wet mud to uneven rocks and pebbled beaches.

Iguana Yachts has now boats all over the world across six continents.
